**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to an autotensioner, classified in class 474, subclass 135.
  - II. Claims 7-11, drawn to a thin autotensioner, classified in class 474, subclass 133.
  - III. Claims 12-13, drawn to a method of assembly of a thin autotensioner, classified in class 29, subclass 892.
  - IV. Claims 14-20, drawn to an autotensioner and friction member, classified in class 474, subclass 109.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the autotensioner of claims 1-6 does not require the torsion spring being twisted and house

in a cup as in claims 7-11. In addition, the autotensioner of claims 1-6 does not require the friction member with a plurality of grooves that brakes the rocking arm of claims 14-20.

3. Inventions I, II, IV and III are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method steps can be made to assembly a vibration damper for a chain drive.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
